actions of FPT University students have participated in community activities to contribute to the protection of marine resources and the environment – SDG 14.

Vietnam has a distinct geographical structure with a long coastline of more than 2000 km along the border. The awareness of marine environmental protection has been instilled in every Vietnamese.

Da Nang is a coastal city famous for tourism in Vietnam. FPT University's staff and students in Da Nang clearly understand the responsibility to PROTECT THE BEAUTIFUL MARINE ENVIRONMENT offered by nature. Activities to protect the marine environment regularly take place on Sundays at Da Nang beaches, where FPT University students together with the local community collect garbage and clean the beaches. The faculty of Tourism and Hospitality Management has included in the EXTRACURRICULAR PROGRAM THE PRACTICAL LESSONS OF ECOTOURISM EXPERIENCE.

Students of the Faculty of Tourism of FPT University participate in designing MARINE TOURS, in which an indispensable part is the activities to protect the marine ecological environment.
