Psychological support

Psychological problems of school age always pose a responsibility to society and the school. Especially after more than 2 years of the covid pandemic, this issue has received more attention and investment. Previously, FPTU had activities to support students' psychology "Coc Ke". More than 300 students each semester join 'Coc Ke' for psychological advice and counseling.

But the real need for school psychology care today is really great. Stemming from love and responsibility during the pandemic with their students, a group of FPTU lecturers opened a topic: "Hồ Sen Chờ Ai" (HSCAI) as a place for students to share and remove their concerns, worries, needs to be answered and even deadlocks in their private lives.

Speakers "Hồ sen chờ ai?"

Without using sophisticated tools "Hồ Sen Chờ Ai" (HSCAI) uses the GM platform, students can remain anonymous. The principles of counseling that teachers set are: listen, understand, share, do not judge, do not impose. Not only lecturers, participants, and students can contribute ideas and support. So far this operation has been more successful than expected. Experiencing 18 topics such as: Thank you, Hot, Love, Offline for a year, Spicy,

On average, 80-100 students from all over the country attend each topic, including high school students and other schools in Vietnam. They look forward to every 3rd Friday of the month to share their story.

*Selection session for members and mentors of **Bro-Sis** program*

*"**Brothers and sisters**" welcome new students and are ready to support them.*

The **"BROTHERS AND SISTERS" PROGRAM** is an annual activation that supports freshmen as they adjust to their new learning environment at FPT University. Seniors are seen as bridges connecting freshmen with and helping them adapt to the new living and learning environment at FPT University. This is a defining aspect of FPT University's educational environment.

Since the end of 2019, Vietnam has suffered from four waves of COVID-19 outbreaks. The fourth wave, which began at the end of April 2021, continues to have a negative impact on Vietnam in general and the education industry in particular.

Notably, for FPT University in Ho Chi Minh City, Can Tho, Da Nang, and Hanoi, the university has adjusted rapidly to the new normal. From March 2020, all courses and events have been moved online.

The university has made initial TREATMENT RECOMMENDATIONS and provided the NECESSARY INFORMATION for the students and employees affected by COVID-19. The university has organized VACCINATION PROGRAMS for the majority of its employees, teachers, including foreign teachers while also encouraging and reminding everyone to be vaccinated as soon as possible. FPT University campuses in Hanoi had dedicated its 2,000-room dormitory to be A QUARANTINE SITE during the outbreak of the COVID-19 pandemic in 2019 and 2020, while the university students were studying online at home.

6 students are rewarded for their participation in COVID-19 frontline prevention work in Can Tho city

An annual blood donation program 'Warm hands' (Vong tay am)

In August 2021, the dormitory of FPT University Da Nang **DONATED AROUND 202 ROOMS, TOTALING 800 BEDS, WITH FULL ELECTRICITY, WATER, AND SERVICES FOR COVID-19 PATIENTS.**

During the pandemic in Ho Chi Minh City and Can Tho City, many of the university's staff and students volunteered to **JOIN THE "COVID-19 FRONTLINE PREVENTION TEAM"**, providing food and medicine to medical staff, patients, and families, as well as disadvantaged children in hospitals and blockage and rural residential areas.

FPT University Dormitory is utilized as a quarantine site until COVID-19 is over

Hope School students with leaders, guests, sponsors, and teachers and staff.

Not only helping the Vietnamese community, but several FPT University staff and students have also **JOINED CHARITIES AND NGOS TO DONATE MEDICAL SUPPLIES TO OTHER COUNTRIES** who are suffering from the pandemic, including Italy, the Czech Republic, the United States, and India. These activities are organized by International Centre for Theoretical Physics (ICTP) graduates (Triest, Italy), The Vietnam – US Alumni Club, along with a few other supportive activities that we have not had the complete list of.

The President of Vietnam beats the drum to open the opening ceremony at Hope School.

FPT Corporation's Hope Fund was established in 2017, where FPT University members can donate to help low-income households, underprivileged children and people with disabilities maintain stable daily life during the COVID-19 pandemic.

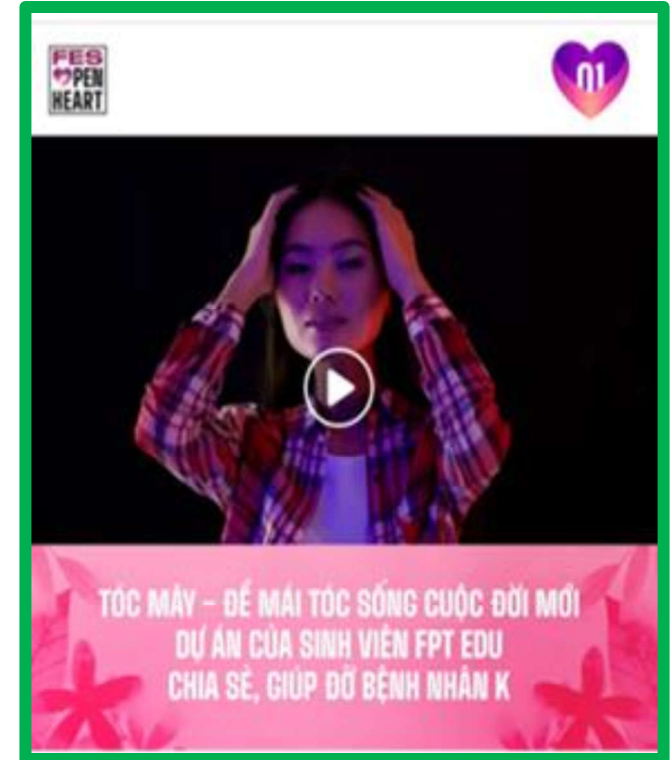

The fourth outbreak in Vietnam caused severe consequences, especially in Ho Chi Minh City. More than 30,000 people died. Even more painful, thousands of children lost their parents. In September 2021, FPT President decided to open a school to receive orphans because of the pandemic. In August 2022, the Hope School for orphans of FPT welcomed the first 200 students. The children are raised completely free of charge until they start a business. FPT School and FPTU are schools for children of all ages.

And today, the smile has returned to children. Children and the vegetable beds grown by themselves.

Not only helping the Vietnamese community, but several FPT University staff and students have also **JOINED CHARITIES AND NGOS TO DONATE MEDICAL SUPPLIES TO OTHER COUNTRIES** who are suffering from the pandemic, including Italy, the Czech Republic, the United States, and India. These activities are organized by International Centre for Theoretical Physics (ICTP) graduates (Triest, Italy), The Vietnam – US Alumni Club, along with a few other supportive activities that we have not had the complete list of.

Tóc Mây project of the FE (FPT Education) student group - LET YOUR HAIR LIVING A NEW LIFE - the project aims to connect kind hearts and give K patients loving curls. Hair donated through the project will be sent to the Breast Cancer Network Vietnam (BCNV) for preliminary processing and sent to hospitals.
