

Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss

8,732 shade trees and 35,000 square meters of grass lawns have been planted across the five FPTU campuses, creating lush, green environments that promote sustainability and well-being.

The unique rooftop gardens of the Ho Chi Minh City campus stand out, featuring innovative designs that blend architecture with nature, providing serene green spaces in an urban setting.

“20 Green Kilometers for a Safe City” Campaign

The “[20 Green Kilometers for a Safe City](#)” campaign, organized by the Live & Learn Center for Environment and Community and sponsored by the Danish Embassy, encourages people to use green transportation methods—such as walking, personal bicycles, public bikes, buses, electric vehicles, and trams—in their daily commutes. For every 20 green kilometers, the campaign contributes one tree to the reforestation fund. The FGreen group from FPT University Can Tho mobilized over 30 youths and lecturers to participate, covering more than 500 kilometers and contributing over 25 large trees to help restore the Xuan Lien forest in Thanh Hoa province through the [Gaia Nature Conservation Center’s](#) reforestation fund.
