research publications aligned with SDG 17: Partnerships For The Goals were published by FPTU faculty members in 2025

3,376

FPTU students joined short-term study and exchange programs at overseas partner universities in 2025

25%

FPTU integrates SDG-related content across all academic programmes, with 25% of courses incorporating SDG-related topics. Notably, 35 courses are fully dedicated to SDGs, equipping students with the knowledge and competencies needed to contribute to sustainable development.

International cooperation for technology development: FPTU joins the Semiconductor Alliance

On November 27, 2025, FPTU officially joined the Semiconductor Alliance, a phase-1 network of more than 20 organizations, including Vietnam National University Hanoi, Vietnam National University Ho Chi Minh City, international universities such as Sungkyunkwan (South Korea), Kumamoto (Japan), and HSE (Russia), and major companies like Viettel, FPT, and Nisso. Within the alliance, the university helps build a training-research-enterprise cooperation model, receives support for lecturer training and access to shared labs, and expands ties with international universities to acquire training technology. This cooperation supports the development of a high-quality workforce for the semiconductor industry in Vietnam and worldwide.

International cooperation on environmental data collection: IQAir CEO visits FPTU

Frank Hammes, CEO of IQAir – Switzerland's leading air quality technology company – visited and held a working session at FPTU Ho Chi Minh, presenting the university with the "2026 Vietnam Top Education Air Quality Contributor" award. FPTU currently operates 5 air quality monitoring stations across its 5 campuses, with data synchronized to IQAir's global system, attracting nearly 60,000 online views. Directly contributing air quality data to the global monitoring network supports international efforts to collect and make environmental data transparent for sustainable development purposes.

FPTU promotes multi-stakeholder collaboration for para sports through Vietnam ParaSport Creator Lab 2026

On July 25, 2026, in Hanoi, the Vietnam ParaSport Creator Lab Summit 2026 closed out the nearly 4-month “Sports Without Barriers” program co-organized by FPTU, bringing together around 80 para-athletes along with representatives from the Vietnam Sports Administration, the Vietnam Paralympic Committee, and TikTok Vietnam. Through online training sessions and workshops held in Da Nang and Ho Chi Minh City, athletes were equipped with content creation skills and personal branding on digital platforms. The program connected regulatory agencies, sports organizations, and technology companies in pursuit of inclusion and equal opportunity for people with disabilities.

Cross-sector dialogue on digital transformation: FPTU joins Corporate Governance talk in Tay Ninh

On March 21, FPTU Ho Chi Minh collaborated with the Tay Ninh Provincial Youth Union and the Tay Ninh Young Entrepreneurs Association to organize the talk “Corporate Governance in the Digital Era.” University experts shared technology trends such as AI Agents, automation, and data management, helping young entrepreneurs and local youth union members apply digital transformation to their business operations and build their brands through digital platforms. The event connected the university with local government bodies, youth organizations, and the local young business community.

Cooperation with a humanitarian organization through a volunteer program: FPTU and Can Tho Red Cross organize blood donation drive

In response to National Voluntary Blood Donation Day (April 7), FPTU Can Tho was one of 3 collection sites in the city, collaborating with the Can Tho Red Cross to collect more than 600 units of donated blood, contributing to a total of 14,197 units mobilized by the Red Cross since the start of the year to support emergency care and treatment across the Mekong Delta region. This collaboration helps sustain an annual volunteer activity serving community healthcare needs.

International connection through educational experience: FPTU Summer Jamboree 2025

From July 18–20, 2025, at FPTU Da Nang, FPTU Summer Jamboree 2025, themed “Prompt Your Future,” brought together nearly 2,000 domestic and international students from the Philippines, Singapore, Canada, India, and other countries for a multidimensional educational experience spanning academics, technology, culture, society, and sports. The program featured the AI workshop “Empowering Minds with AI,” led by Prof. Jason J. Jung (Chung-Ang University, South Korea), along with the “Green Steps – Green Life” activity, in which more than 200 campers collected litter and cleaned up Tan Tra Beach. The event gave students from various countries the opportunity to take part in academic, cultural, and community activities together in an international exchange environment.

FPTU International Day 2025: Harmony Verse

In 2025, FPTU Hanoi organized FPTU International Day 2025 under the theme “Harmony Verse,” bringing together Vietnamese and international students for cultural exchange activities. The program included booths showcasing different countries’ cultures, interactive activities, and multicultural art performances, giving participants the opportunity to learn about and share different cultures. The event created a space for exchange between domestic and international students, helping promote cross-cultural understanding and strengthen connections within the multinational learning community.

FPTU fosters international collaboration in technology education with Google Developer Groups through DevFest on Campus 2025

On November 22, 2025, Google Developer Groups on Campus FPTU, in collaboration with GDG Ho Chi Minh City, organized DevFest on Campus 2025 in an online format. The program featured sharing sessions and hands-on practice with Google AI technologies such as Vertex AI Studio and the Gemini API, with the participation of an expert from EPAM Systems. As part of the global Google Developer Groups network, the event gave students the opportunity to access knowledge, tools, and practical experience from the international tech community.
